Easy to adjust and install

It's easy to adjust and install. With different sizes (3 heights, 4 widths, 6 lengths), space utilization is highly increased. The nets can be adjusted up or down by 100 millimeters with disassembly. Shelves can be built to U-shape units with corner connectors.

Absolutely firm, durable and stable

Made from a steel core and polypropylene. Inner steel provides high intensity and durability. Exterior PP is anti-corrosion and break-resistant. Post connectors provide exceptional stabilization.

Never rust

Can be used anywhere, no matter moist or dry, weldless, never rust. Resists corrosion by brine or marine air. Suitable for coolers and freezers, available under -38°C.

High Density Mobile Shelving Storage System

Maximum storage capacity can be achieved by forming a storage channel in all available space. The mobile shelving storage system is composed of the basic units on the raised track, with high density movable shelves in the middle. Tracks are easy to be installed without drilling or bonding.

40%
Increase Storage Capacity

A: Stationary Units
B: Mobile Units
C: Track
D: Active Aisle

The track conveniently connects to the bottom of stationary shelving, no bolts or drilling into the floor are required. Using the connecting bolt to fasten the track.

Raised track provides a smooth surface for mobile units. It ensures dirt will not get trapped, and is easy to clean. Shelves unit with heavy weight lands can roll smoothly on the track.
